With a network consisting of over 90 autonomous dealers, the lift truck group provides quality materials handling equipment to the wide-ranging North American marketplace. Doosan Infracore America Lift Truck sellers successfully operate in over 220 service and sales places throughout Canada and the U.S. The forklift product line impressively includes 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous truck designs range from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift business in the North American marketplace, due to their stability in retaining a high degree of consumer service excellence and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. forklift division based in Cleveland has a skilled team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the home-based lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled lift trucks as part of a domestic equipment expansion project. Sales of these products were originally targeted to state-run companies, large scale corporations, and the military. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education became the new focus for enhancing quality and product development.

Domestic forklift trade for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's advanced technological advancements combined with sales success placed them in a position of significant growth of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to respond to competitive pressures in the US materials handling market. This plan greatly expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a new plant which helped set up the company for the manufacture of high added-value products suited for export. In 1993, the corporation had a global sales network and started exporting models they had established through in-house technology, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international markets.
