

## Aerial Work Platform

Aerial Work Platforms - There are many accessories used for lift trucks that could be used so as to help expand the functionality of your lift truck and allow you to carry stuff, handle materials with out difficulty or to accomplish clean-up tasks.

Several attachments were specially intended for the forks themselves. For example, fork extensions can be used if you need more fork length, which increases lifting capability. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Rounded or triangular accessories are another type utilized whenever transferring rolled material in order to ensure it does not roll off of the traditional flat blades.

Lifting attachments could be pivoting and telescoping crane attachments. They are available in many styles. These accessories are usually meant for transferring metal bars, poles, lumber or whatever kind of bulky stuff. Additional attachments such as various styles of hooks and hook plates are available so as to pick up stuff with a chain or sling. Magnetic lifters and slab lifters are other objects which could be used together with hook accessories. Slab lifters are specialized accessories which are intended for carrying a variety of materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that attach to your forklift so as to make transporting rolls of carpet much easier. The attachment connects onto the forklift's forks and has a pole that goes through the center of the carpet roll.

There are various types of forklift attachment intended for facility maintenance like for instance snow forks. These industrial forks could be connected to front end loaders and meant for moving materials like for instance snow, dirt as well as mulch. Other popular cleanup attachments include magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the forklift blades connect onto for sweeping big spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal debris such as on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up easy and fast.

Material spreaders are other attachments used on lift trucks. These spreaders are useful for a range of applications like spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Work platforms are another optional lifting accessory that numerous companies use daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are several models offered that are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location making use of the lift truck. Larger platform units have additional space for employees to bring tools and other essential items intended for the job. Usually work platforms are made of poly material or steel.
