

Forklift Electrical Part

Forklift Electrical Parts - Lift trucks could be purposely labeled to be used in dangerous sites. A marked lift truck denotes the design has met the minimum requirements of ANSI/UL 558 meant for engine powered forklifts or ANSI/UL 583 for electric lift trucks for the type of label attached.

The application for labels used for lift forklifts may be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Check with your local insurance provider and Fire Marshall for further info concerning the approved uses of industrial powered trucks in your application.

If the specific forklift satisfies the outlined criteria, labels can be attached. A labeled forklift will show the type of designation put on the nameplate and will have a correctly corresponding label placed.
